CorrOcean A/S  
Attn: Roe Strømmen  
P.O. Box 816  
N-7001 TRONDHEIM

Dear Roe,

I want to congratulate you and your staff at CorrOcean on the successful completion of our CNRD 6-7, SEACORR/CP project. The entire project has been an outstanding example of cooperation and technical achievement. The computer program, SEACORR/CP, is the most sophisticated and accurate cathodic protection modeling/analysis tool available and Walter Keim is unquestionably the most knowledgeable person on its' design and applications. Together they clearly place CorrOcean as the world leader in this field.

On behalf of Conoco Norway Inc., I acknowledge that CorrOcean has fulfilled its contractual obligations under the CNRD 6-7 contract, Cathodic Protection - Computer Software Protection and grant CorrOcean the final acceptance of this project work.

Best regards,

*Dick*
